

Superjet 2500 & Superjet 2600

With the Superjet 2500 / 2600 skid mounted jetting machines Rioned has designed compact mainframes in which various water cooled engines, high pressure pumps and water tanks can be mounted; completely adapted to the specific demands of customers. The water cooled diesel motors and high pressure plunger pumps do not run at maximum revolutions. The machines have a powerful and sufficient output capacity at low noise levels, enabling a 10-15% increase in capacity of these machines in extreme situations.

The capacities of the Superjet 2500 / 2600 machines vary from 120 to 270 bar and from 50 lpm to 120 lpm. The delivered water tank capacities can be 500 ltr, 650 ltr or 800 ltr. The machines are of very high quality, reliable, almost maintenance-free and particularly suitable for professional, daily performance.

The **Rioned Superjet** Skid-mounted Jetting Machines are optimally tuned to the present market demands. The machines are very compact and practically built and are supplied with a separate engine, or are driven by means of a PTO-system. Therefore, the Rioned Superjet Skid-mounted Machines can be built almost all types of vans and chassis with sufficient space and weight to accommodate other tools, such as spring machines, tools, CCTV inspection systems, etc. The Skid-mounted machines, as are all Rioned High Pressure Jetting Machines, are of very high quality, reliable, almost maintenance-free and particularly suitable for professional and daily performance. The Rioned Superjet series offers very high efficiency and lowest possible costs.

The Superjet series of Rioned offers:

- Powerful, maintenance free, petrol or diesel engines, combined with very reliable Speck/Rioned high pressure pumps with ceramic plungers and automatic pressure regulator with stepless pressure regulation and bypass
- Rioned "Compact system" polyethylene water tanks with hydrant filling possibility, manhole, overflow pipe, return pipe and a sight glass. Rioned water tanks can be recycled
- High pressure hose reel (mostly 90 pivoting as for the Superjet 2500/2600 and Superjet 3100) with large hose capacities and with the possibility of electric or hydraulic hose reel drive. A pivoting hose reel ensures more ease of operation (simple access to the most important parts of the machines), safety and a better inlet of the high pressure hose in the drain/sewer
- Simple operation by one-man on the back of the machine
- Well designed and compact construction combined with user friendliness
- Oil-drainage hoses for the very simple drainage of motor and pumps oil
- System of collapsible hose guide for the hydraulic high pressure hose reels
- Access to a wide range of high pressure jetting accessories

Superjet 2500:

Motor: Lombardini or Kubota water cooled diesel engine
 Pump: Pratisolli or Speck/Rioned P45 or P52 plunger pump

140 bar/70 lpm, 150 bar/75 lpm, 150 bar/85 lpm.

Outfit: water tank 500, 650, 800, 1000 ltr - pivoting hydraulic high pressure hose reel - pivoting hand driven supply hose reel - complete control box.

Accessories: 2 jet nozzels 1/2" - 1 pistol with lance and Nozzel

Weight: between 600 and 750 Kgs.

Superjet 2600:

Motor: 48 HP Kubota water cooled diesel engine
 Pump: P52 plunger pump
 Capacity: 250 bar/60 lpm, 150 bar/100 lpm, 120 bar/120 lpm

Outfit: same outfit as mentioned with the Superjet 2500
 Weight: approx. 800 Kgs.
