

**VACUUM TANKER
COMBI : Suction & Jetting**

**Typical Configuration of a COMBI Jetter
and Swivel Boom system .**

Zenith's combination vacuum / jetter unit represents the most efficient and updated unit employed nowadays in the field of vacuum-suction and high-pressure cleaning.

All equipments are usually custom-made in order to meet all the specific requests of the end users. They are normally fitted with a total power take-off and mechanical drive to the pumps.

This gives :

- high reliability
- easy maintenance
- low weight
- compact construction

VACUUM TANKER (Suction & Jetting)
Hydraulically operated swivel Hose Reel

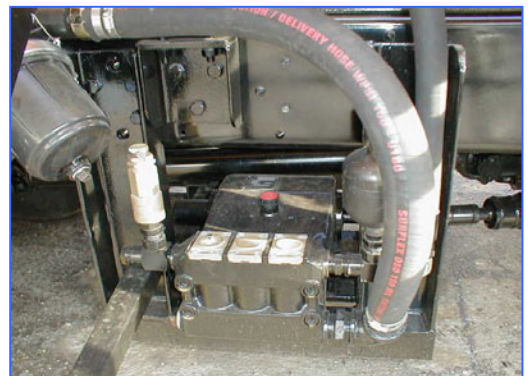

Hydraulically operated swivel hose reel
Effortlessly wind and unwind jetting hose . Accepts hose lengths of upto 100 meters and diameter of 1".
Normal Winding speed 30 rpm (based on PTO output @ 800 rpm & pump flow of 110 lpm)

Firmly welded to rear dish-end and unobstructive during suction & discharge operation.

- Swings out 90 deg
- Hose guide ensures smooth winding.

PTO driven , High pressure 3-piston pump for jetting operation .

Auxillary hose reel for general cleaning operations.
